

24" T-Bar Box Hanger

24" T-Bar Bracket

24" T-Bar Box

Part

TBAR-24C-B

Description

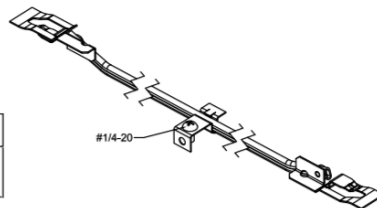

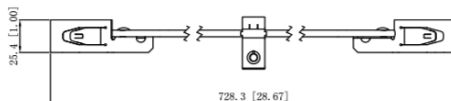

24" T-Bar Box Hanger W/Clip

Quantity Per Box

50

These **24" T-Bar Brackets** are used with boxes that are 1-1/2" or 2-1/8" deep on metal or wood studs for box positioning in walls and ceilings. They are also used to mount boxes on ceiling "T-Bar" grid and other structural members. Fixed length box bar hangers are available for 1-1/2" or 2-1/8" deep boxes. The locator dimples on the face of the bars allow for an exact positioning of single or multiple boxes. The dimple feature also provides quick start of screws and reinforcement to prevent the electrical box mounting screws from stripping out when boxes are being mounted. Adjustable brace design allows ground screw to clear when boxes are mounted. The boxes attach easily with self tapping screws, making the installation virtually effortless.

SIDES	BOTTOM
1 PCS 1/4-20X3/8 Screws Installed	
Material: Steel-600 Galvanized
